

Foreword

Angels.
Angels??!

Can they *really* help us?

Are they really able to assist us with every aspect of our lives, and even bestow miracles upon us?

How could this be so?

Sure, I've heard of Archangel Gabriel bringing a message to the shepherds about a Messiah being born, but why would an angel come to me?

I'm just an ordinary person. Things like that wouldn't happen to me!!

Would they?

Yes they would!

We are all equal in the eyes of the Creator and also in the eyes of the angels. This means that each and every one of us deserves love, attention and *miracles* to happen in our lives.

During these times of huge changes, more and more people are experiencing 'angel encounters' as angels flock to our planet, making themselves readily available to everyone who calls upon them. The angels' mission is to heal us from our challenges and to instill peace and love into our hearts, so that we may focus on our own life purpose. The angels are always in the background waiting patiently for us to ask for advice and guidance, so that they can gently and lovingly lead us in the right direction.

We can call as many angels into our life as we'd like, and the more we think about them, the more angels will surround us. The angels' energy lifts us greatly, especially when we truly feel their loving presence.

There are absolutely no limits to the ways angels can assist us. They can help us with relationships, careers, finances and any other challenge that may be troubling us. They urge us to listen to and connect with them, and will often try to contact us directly, or perhaps lead us to someone who can help us to become more aware of their presence, or guide us to a certain book . . . and it is by no mistake that you are reading these words today.

The magical pages of *Angels: Winged Whispers* take us through what some may deem as *extraordinary* stories of people who have had encounters with angels, of

how the angels have sent messages to these ordinary people in the form of animals or deceased loved ones, or through words, thoughts and visions, to save or transform their lives in some way.

Within each chapter is a wealth of delight as the writers share their own unique stories and teachings with us, so that we too may have our own very *real* connection with angels.

As the reader, we are introduced to various methods of working with the angels, such as sacred ceremony, working with crystals, receiving direct messages and noticing signs. We are given clear reminders to call upon the angels for comfort in times of need, and of bereavement, bridging Heaven and Earth.

We are also introduced to working with those magical manifestors, the faeries (Nature's Angels), and how we may connect with and be at one with the natural world of magic that is within and all around us.

Now is the time for us to awaken to the gifts that we have denied ourselves for so long. The angels are waiting . . .

So feast your eyes on this treasury of insights, stories, teachings and messages, and awaken to the miracles in your life. The more you notice them, the more they will happen.

May you always walk with angels . . .
