**SWP: Tell us a bit about your background.**

Before kids, I went to college and majored in Art History. Loved it! As a pilot, I flew for the Air Force and Pan Am and had lots of adventures around the world. After kids, the earth started calling me and I learned about herbs, essential oils, flower essences and started up a company that created Animal Spirit and Goddess essences and essential oil blends. At the same time, my house was calling and I started down my path of learning about home harmonizing, dowsing, sacred geometry and more!

**SWP: How has your upbringing influenced your writing?**

My parents raised their children to be very self-sufficient. I knew at a young age that I could do anything I wanted to do and was able to do things as well or better than many boys. I never saw any obstacles, just the delight in trying and achieving and this same attitude has opened doors to writing this chapter.

**SWP: What inspired you to write your chapter for *Planet Whispers*?**

After reading the requirements I felt that I could do it! I am involved in building a new company - *The Boulder Centre for Master Builders* - and wanted to share how I became interested in the knowledge that we are teaching. This chapter seemed a wonderful way to tell a bit of my story.

**SWP: What are your thoughts on being part of this anthology of writers?**

I'm very excited about this whole process. There are so many wonderful people sharing their wisdom and it is fun to be a part of a process that involves so many others. I can't wait to read the other chapters! I'm sure they will be inspiring. It is nice to be a part of a community of writers as well.

**SWP: Where do you see yourself in five years?**

My business partner and I are creating a teaching center to spread the information of the Master Builders. We will be teaching classes, leading tours around the world and building a teaching center that highlights the information we share. It will be a very experiential place, where people can come and feel the energy of a big stone circle, labyrinths, and meditation places. This helps people to understand in their bodies and is why this information is so important.

**SWP: If you could leave your readers with one bit of wisdom, what would you that be?**

Don't be afraid to listen to the callings of your heart and soul. As you experience the journey, it is well worth the work that happens along the way. Many things that end well look bad in the beginning.

**SWP: Where can we purchase the book?**
